2) The present application relates now to hair conditioning solid emulsions comprising at least one hair conditioning agent and at least one solidifying ingredient; wherein the at least one solidifying agent comprises cocoa butter and the product is prepared from a mixture including 10% to 50% by weight of the cocoa butter.

3) The amendments filed by the Applicant with fax of 08.12.2003 fulfil the requirements of Article 34(2)(b) PCT. They are therefore allowable.

4) Re Item V

4.1 Novelty (Art. 33(2) PCT)

Document **D2** has been published after the priority date (11.01.2002) but before the filing date (13.01.2003) of the present application. In the case where the priority of the present application has been validly claimed, **D2** is not regarded as prior art according to Rule 64.1(b)(ii) PCT. However, if the priority of the present application turns out not to be validly claimed, this document may be considered as relevant prior art within the European examination procedure, for the assessment of novelty according to Article 54(3) EPC.

No other document in the available prior art discloses a composition or a method as in independent claims 1 and 17. The presently claimed subject-matter is therefore regarded as novel.

4.2 Inventive Step (Art. 33(3) PCT)

Documents **D3** and **D4**, which are regarded as the closest state of the art, disclose solid shampoo and hair conditioning emulsions (see **D3**, col. 5, l. 16- col. 6, l. 10 and examples 1-2; **D4**, pg. 7, l. 39-44). Claim 1 differs from **D3** and **D4** in that one of the solidifying agents

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB03/00096

is cocoa butter. The problem to be solved by the present application may thus be regarded as providing **alternative** solid emulsions for the **conditioning of the hair**.

Document **D1** discloses (see abstract and pg. 3, last par. to pg. 4, par. 2) solid cosmetic emulsions for the **treatment of the skin**, comprising 16-76 % by weight cocoa butter and a method for the preparation thereof. There is however no hint in **D1**, which suggests the application of the method disclosed therein, in the preparation of solid emulsions for conditioning the hair. The skilled person would thus find no motivation to combine **D3** or **D4** with **D1**. Therefore, the presently claimed subject-matter is regarded as inventive.

4.3 Industrial applicability (Art. 33(4) PCT)

Is acknowledged for the whole set of claims.
